

How to Make a Fly Trap

Materials

1 or 2 liter plastic soda bottles
Heavy scissors
24" lengths of string
Bait: Raw meat soaked in a small amount of water ; old piece of fruit, like ripe banana; sugar water with molasses/syrup

Construction

Using 1 or 2 liter plastic soda bottles, remove label and rinse out with water.
With heavy scissors separate the top of the bottle from the bottom (see diagram). The cut may need to be started with a razor blade or knife.
Invert the top into the bottom part of the bottle.
On opposite sides of the container, punch holes using a hole punch or cut "L" shaped slits.
Lace 24" of string through the holes or slits and tie with a secure knot to create a hanger.
Place the bait in the bottom of the trap.

Avoid traps in your life

Traps work because they don't "look" like traps -- the one being trapped doesn't realize it's a trap. So be on your guard at all times.

Proverbs 13:14

The instruction of the wise is like a life-giving fountain;
those who accept it avoid the snares of death (NLT)

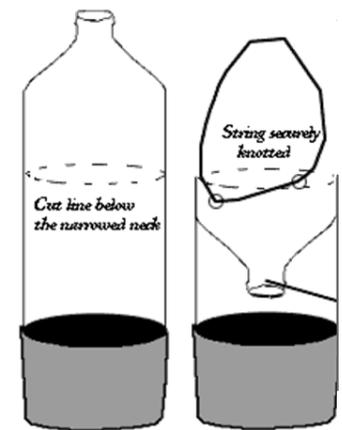

Proverbs 29:6

Evil people are trapped by sin, but the righteous escape,
shouting for joy. (NLT)
